The antibodies bind to BLyS and so may be used to detect and quantitate the presence of BLyS in biological samples and may be used in this way to diagnose disease associated with aberrant expression of BLyS. They may also be administered to treat diseases associated with aberrant BLyS expression and activity such as cancer, immune, and autoimmune disorders and diseases, e.g. systemic lupus erythematosus, rheumatoid arthritis, immunodeficiency (e.g. common variable immunodeficiency (CVID) and acquired immunodeficiency syndrome (AIDS)). ABP43990-ABP47228 represent the antibodies and fragments of the antibodies described in the method
                                                                                                                                                                                                                                                                                                                                                              Key

BLyS is a member of the tumour necrosis factor (TNF) super family and induces B cell proliferation and differentiation. The antibodies of the invention have
                                                                                                                                                                                                               Region
                                                                                                                                                                                                                                                                          Region
                                                                                                                                                                                                                                                                                                                                                                                                                                                           Homo sapiens
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                AAY96065 standard; protein; 122
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence

                                                                                                                                                                                                                                                                                             The present sequence is that of the heavy chain variable region (VH) of the anti-decay accelerating factor (DAF) human antibody LU20. The VL region is given in AAY06062. LU20 was produced using a Covel method for making antibodies which can be used for cancer antibody phage from a naive antibody phage library to a live cancer cell; (b) selecting an antibody phage or antibody which binds cell; (b) selecting an antibody phage or antibody which binds to which the antibody phage or antibody binds. To obtain LU20, a counter-selecting with a non-tumour bronchial epithelial cell line, and counter-selecting with a non-tumour bronchial epithelial cell line, antigens by panning the lung adenocarcinoma cell cell cell line, antigens by panning the lands odescribes a method for identifying an antigen because the surface of composition comprising the antibody, is useful for in vivo cancer diagnosis or therapy. In particular, the antibody is useful for diagnosing or treating lung cancer, e.g. small-cell lung cancer, con-small cell lung cancer, large cell lung carcinoma (all claimed).

The antibodies bind to BLyS and so may be used to detect and quantitate the presence of BLyS in biological samples and may be used in this way to diagnose disease associated with aberrant expression of BLyS. They may also be administered to treat diseases associated with aberrant BLyS expression and activity such as cancer, immune, and autoimmune disorders and diseases, e.g. systemic lupus crythematones, rheumatoid arthritis, immunodeficiency (e.g. common variable immunodeficiency (CVID) and acquired immunodeficiency syndrome (AIDS)). ABP43990-ABP47228 represent the antibodies and fragments of the antibodies described in the method
                                                                                                                                                                                                                                                                                                                                                                                                                                   Human; 5' EST; expressed sequence tag; secreted protein; diagnosis; gene therapy; chromosome mapping; upstream regulatory sequence; forensic; location; development; protein synthesis; stability; regulation; identification.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Human 5'
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   01-FEB-2000

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         of the invention.
AAZ42265 to AAZ43075 represent novel 5' expressed sequence tag (EST) sequences, corresponding to human secreted proteins. AAY64651 to AAY66538 represent the EST-related proteins corresponding to AAZ42265 AAZ43052. The 5' ESTs can be used for producing secreted human gene
                                                                                                                                                         N-PSDB;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     CC products. They can be used to identify and isolate 5' untranslated cc regions (UTRs) and upstream regulatory regions which control the clocation, development stage, rate, and quantity of protein synthesis, as cc well as stability of mRNA. The ESTs are also useful as probes for cc chromosome mapping, and to obtain full length cDNA clones. The ESTs can calso be used in forensic procedures to identify individuals, or in cdiagnostic procedures to identify individuals, or in consulting from abnormal gene expression. The products may also be used in cc gene therapy protocols. The nucleic acids encoding signal peptides can be cc used for directing extracellular secretion of a polypeptide into a membrane, or importing a polypeptide control a cell. The proteins encoded by the EST sequences may be useful in cc therappetic value, and the identification of new secreted proteins is caluable. AAZ42249 to AAZ42264 and AAX64644 to AAX64650 represent cx sequences used in the exemplification of the present invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Matches

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                र्
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         밁
The present sequence is an agonist antibody clone to the human WSX creceptor, which can be used to identify and purify ligands and cactivators. An anti-WSX receptor antibody can be used as an agonist to activate the WSX receptor, leading to enhanced proliferation or differentiation of a cell expressing the WSX receptor. It can also be used to decrease body weight and/or fat-depot weight and/or food intake in an obese mammal. WSX receptor ligands can be used to cenhance proliferation or differentiation of lymphoid, myeloid or cenhance proliferation or differentiation of lymphoid, myeloid or cerythroid blood cell lineages. This is useful when a mammal. Cespecially a human, is suffering from decreased blood cell levels, i.e. anaemia, caused by chemotherapy, radiation therapy or bone commartow transplantation tharapy. It can also be used to treat, composition of the composition 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Query Match

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              60
```

This invention describes novel antibodies that immunospecifically bind to E Lymphocyte Stimulator (BLyS) polypeptides. BLyS is a member of the tumour necrosis factor (TNP) super family and induces B cell proliferation and differentiation. The antibodies of the invention have cytostatic, immunosuppressive, immunostimulant, immunomodulatory,

                                                                                                                                                                                                                                                                                                                                                                                                                                                              fused to a fluorescent protein. The method comprises constructing a scPv antibody library composed of phage clones expressing scPv antibody on their surface, screening this library with an antigen, extracting the gene for scPv antibody from the selected phage clones and inserting it into an expression vector that expresses the gene fused to a fluorescent protein. Also described are: (1) a fusion protein comprising the scPv antibody fused to a fluorescent protein; (2) immunological assays using the fusion protein of (1); (3) an expression vector encoding the fusion protein of (1); and (4) a kit for producing the fusion protein of (1). The fusion protein can be used in immunoasys and immunobtaining.

The fusion protein can be used in immunoasys and immunostaining. The fusion protein do not require a secondary or tertiary antibody. Direct intracellular and even in vivo assays are possible. ABJ49521 to ABJ49591 and ABB06286 to ABB06276 represent
                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Producing scFv antibody fused to a fluorescent protein, useful for immunoassay and immunostaining, comprises expressing a scFV gene (extracted from selected clones) fused to a fluorescent protein gene
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        WPI; 2002-098058/13

Sequence

```
CC fragment, having binding specificity for CC-chemokine receptor 2 (CCR2), comprising an antigen binding region of non-human origin CC (CCR2), comprising an antigen binding region of non-human origin CC and at least a portion of an immunoglobulin of human origin. The CC and at least a portion of an immunoglobulin of human origin. The CC humanised antibodies are useful for inhibiting or treating CC HIV infection. The proteins of the invention are useful for inhibiting CC (CC HIV infection. The proteins of the invention are useful for inhibiting CC (CC arthritis and multiple sclerosis, atterogenesis and atterosclerosis, and for inhibiting restenosis. They are useful in therapy or diagnosis, CC and for inhibiting restenosis. They are useful in therapy or diagnosis, CC and in the manufacture of a medicament for treating CCR-2 mediated CC disease. They are also useful for treating allergy, anaphylaxis, CC malignancy, chronic and acute inflammation, histamine and IgE-CC dimune deficiency syndrome (AIDS), restenosis associated with vascular intervention, including angioplasty and/or stent placement in a mammal. CC Humanised antibodies are also useful for inhibiting narrowing of the CC usesel in a mammal, and inhibiting narrowing of the present sequence is human heavy chain variable (VH) region, UBI-24.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            multiple scierosis; atherogenesis; atherosclerosis; restenosis; asthma; anaphylaxis; malignancy; inflammation; stenosis; allograft rejection; fibrotic disease; angioplasty; acquired immune deficiency syndrome; AIDS; inflammatory glomerulopathy; vascular intervention; 1D9 antibody; neointimal hyperplasia; VH; heavy chain variable region.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Humanized immunoglobulin for treating a CC-chemokine receptor 2-mediated disorder in a patient, comprises a binding specificity for CCR2, and a non-human antigen binding region and human immunoglobulin
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Human; humanised antibody; CC-chemokine receptor 2; CCR2; nephrotropic; neuroprotective; immunosuppressive; human immunodeficiency virus; HIV infection; cytostatic; vasotropic; leukocyte trafficking; allergy; inflammatory disorder; autoimmune disorder; rheumatoid arthritis; shock;

                                                                             뮻
                                                                                                           ঠ
                                                                                                                                                                                                                                     This sequence represents a VH domain complementarity determining region CC (CDR) from an antibody specific for estradiol. The invention relates to Specific binding members (abp) comprising a polypeptide that comprises an CC antibody antigen binding domain (ABB) which has a dissociation constant of at CC less than 1.0x10^-8M for estradiol, and a dissociation constant of at CC less tool-fold higher for the steroid hormones selected from estriol, CC testosterone, dihydrotestosterone, progesterone, estriol-3-sulphate and CC estriol 3-betta-di-glucuronide, where the polypeptide comprises an CC antibody VH domain. The sbps can be used in an immunoassay for CC determining the presence or absence of estradiol in a sample. They can be used for monitoring estradiol levels, e.g. during the menstrual cycle, in CC hormone replacement therapy and for disgnosting osetrogen secreting CC tumours. The sbps can provide for disgnosting osetrogen secreting CC other related steroids.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      The invention relates to producing gene libraries, comprising immunoglobulin light and heavy variable region. The method involves selecting light chain that binds with the heavy chain product to produce a functional conformation, producing a gene library comprising a collection of these light chain variable genes, and combining with gene library of heavy chain variable genes. The method is used for production of gene and antibody libraries. The present sequence represents the amino acid sequence of VH3-4.

                                                                                                                                                                       This invention describes novel nucleic acid fragments that encode human auto-antibodies and anti-idiotypic antibodies against blood platelet membrane protein, GPIIb/IIIa. The products of the invention are used for diagnosis (including monitoring and determining predisposition), prevention and treatment of autoimmune thrombocytopaenic purpura (AITP) and also for modulating binding of fibrinogen to thrombocytes (particularly to dissolve thrombi and/or prevent their formation, e.g. in cases of cardiac infarction or pulmonary embolism). Unlike murine antibodies, human antibodies (hab) do not induce adverse side effects
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Region

The sbps can be used in an immunoassay for determining the presence or absence of estradiol in a sample. They could for monitoring estradiol levels, e.g. during the menstrual cycl hormone replacement therapy and for diagnosing oestrogen secreting tumours. The sbps can provide for discrimination between estradiol a
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        antibody antigen binding domain; steroid hormone; estriol; testosterone; dihydrotestosterone; progesterone; estriol 3-beta-di-glucuronide;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             13-JAN-2000
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      AAY43255;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       This sequence represents a VH domain complementarity determining region (CDR) from an antibody specific for estradiol. The invention relates to specific binding members (sbp) comprising a polypeptide that comprises an antibody antigen binding domain (AABD) which has a dissociation constant of less than 1.0x10 -8M for estradiol, and a dissociation constant of at least 500-fold higher for the steroid hormones selected from estration.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            New specific binding partners for estradiol, used for monitoring estradiol levels during the menstrual cycle, in hormone replacement therapy and for diagnosing oestrogen secreting tumours
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 US5977319-A.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             menstrual cycle; hormone replacement therapy; oestrogen diagnosis; VH domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Estradiol, complementarity determining reantibody antigen binding domain; steroid
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          VH domain CDR of anti-estradiol antibody.
